SLIDES 2 PC MKII Windows Driver Installation

1. **Confirm that you have the newer SLIDES 2 PC MKII and not the older SLIDES to PC. Here's how you tell the difference.**

    SLIDES 2 PC vs. SLIDES 2 PC MKII

    The Original SLIDES 2 PC is not currently supported on Windows 7. The new SLIDES 2 PC MKII is slightly boxier, and has a white round button on the top that says copy on it. The SLIDES 2 PC MKII is supported by Windows 7.

Original	**SLIDES 2 PC MKII**

2. **If you have the MKII SLIDES 2 PC, download the newest drivers at this link:**

    SLIDES 2 PC (2010) - Windows Drivers

3. **Open the folder you just downloaded. Within that folder is another folder titled *SLIDES 2 PC 2010 Driver*.**

    Click and drag that file to your Desktop.

4. **Open the *SLIDES 2 PC 2010* folder that you just dragged to your desktop. Within that folder is another folder titled *SLIDES 2 PC 2010 Driver*. Open that folder.**

5. **There are two folders and a PDF document within. Open the folder with the correct drivers in them.**

6. **You need to know whether your Windows 7 is 32-bit or 64-bit. If you do not know which version you have, here is how to find out:**

   How to determine whether you have 32 Bit or 64 Bit Windows installed on your computer

   Windows Vista or Windows 7

   If you have Windows Vista or Windows 7, there are two methods to determine whether you are running a 32-bit or a 64-bit version. If one does not work, try the other.

   Method 1: View System window in Control Panel

   - Click **Start**, type **system** in the **Start Search** box, and then click **system** in the **Programs** list.

   - The operating system is displayed as follows:
     For a 64-bit version operating system: **64-bit Operating System** appears for the **System type** under **System**.
     For a 32-bit version operating system: **32-bit Operating System** appears for the **System type** under **System**.

   Method 2: View System Information window

   - Click **Start**, type **system** in the **Start Search** box, and then click **System Information** in the **Programs** list.

   - When **System Summary** is selected in the navigation pane, the operating system is displayed as follows:

   - For a 64-bit version operating system: **x64-based PC** appears for the **System type** under **Item**.
     For a 32-bit version operating system: **x86-based PC** appears for the **System type** under **Item**.
     If you cannot determine the operating system bit count with these methods, go to the "Next Steps" section.

7. **Once you have determined whether you have a 32-bit or 64-bit version of Windows 7, open the corresponding folder and locate the *Setup.exe* file.**

8. **Double-click the *Setup.exe* icon to install your SLIDES 2 PC MKII drivers.**

9. **Reboot your computer, plug in your SLIDES to PC, open the included PhotoImpressions software, and enjoy your conversion process!**
