Stereo Alarm Clock with Wireless Phone Charging

## Wirelessly charge your phone and wake up to stereo music!

We've all got to do things in life we don't like—like getting up on time. We've also got to remember to perform those necessary tasks to ensure that tomorrow goes well—like recharging our phone the night before.

With Charge Time, you'll never wake up in the morning with that dreaded "I forgot to plug in my phone last night" feeling. That's because Charge Time has wireless recharging capability that works with any compatible Apple or Android phone. Simply lay your phone down on the top-mounted recharge pad and you're done. No more "I didn't recharge" morning panic attacks.

Charge Time is the perfect device to help keep your life's schedule on track. This is a stereo alarm clock that streams music from any Bluetooth®-enabled device. It has two speakers, dual alarms, a bright, clear LED time/temp display and silent, touch-capacitive control buttons. Its dual USB charge ports let you recharge a second phone and connect a music-playing device at the same time you're using the charging pad. Plus, it has a 3.5mm aux input so you can connect non-Bluetooth devices.

Charge Time definitely does its part to keep you organized and on time. The rest is up to you.
